Profile

Data Science and AI undergraduate with hands-on experience in machine learning, computer vision, and backend API development. Skilled in Python, SQL, TensorFlow, and OpenCV, with experience building data-driven solutions through internships and academic projects. Strong interest in applying AI to real-world analytical problems.

Work History

Business Development Intern, Marcamor: Marketing And Consulting Firm Supported client outreach and lead generation.	06/2024 – 07/2024 Hyderabad
Data Science Intern, Megha AI - Analyzed structured data for traceability analytics - Designed PostgreSQL databases - Built backend APIs	06/2025 – 07/2025 Hyderabad , India
Artificial Intelligence & Machine Learning Intern, Nirvista Group of Companies - Developed frontend apps using React & Flutter - Integrated backend APIs	01/2026 Hyderabad

Education

Bachelor of science and technology in Data Science and Artificial Intelligence: Data Science and Artificial Intelligence, ICFAI UNIVERSITY - Hyderabad CGPA of 8.88	08/2022 – Current
Intermediate, NARAYANA JUNIOR COLLAGE - Hyderabad 93.2 % in IPE exam 2022	05/2020 – 05/2022
Schooling, HYDERABAD PUBLIC SCHOOL - Hyderabad Received 83.4 % in ICSE board exam (year 2020)	06/2011 – 05/2020

Skills

Programming & Libraries: Python, Java, JavaScript

Libraries/Tools: Numpy, OpenCV, TensorFlow, Keras, Streamlit

Databases: SQL, PostgreSQL

AI/ML: Supervised Learning, Deep Learning, CNNs, NLP (Basic), Generative AI (Basic)

Computer Vision & AI: Image processing, Facial Analysis

Cloud: AWS (Lambda, API Gateway, S3)

Projects

Facial age and gender predictions using CNN

Developed a CNN-based model using TensorFlow and Keras on the UTKFace dataset (20K+ images) to predict age and gender.

Circular Object Detection using Hough Circle Transform

Built a computer vision system using Python and OpenCV to detect circular objects by applying Hough Transform

Retrieval-Augmented Generation (RAG) System, *Developed a document question-answering application using Python and Streamlit that enables users to upload PDFs and query information in natural language. Implemented document retrieval and context-based response generation using a Large Language Model (LLM).*

An IoT Project on Voice based light control,

A simple IoT project built with the help of ESP8266 board and ARDUINO IDE.
